The question is not:—"HOW MUCH DO YOU EARN?" but "WHAT DO YOU SAVE?"

Young man, working steadily each day, each week, each month: Can you add \$10 every 30 days to a fund for your mother or father; your sisters or yourself?—\$10 monthly in the strongest and safest bank in the world, bringing in 4 per cent interest and practically invested in government bonds, safe, sure and earning money always?

Are those you would wish to leave cared for in the event of your death given six months of your pay as insurance?

Can you travel at the expense of someone else and be educated by that travel and still SAVE!

Have you time during your working hours to study, to improve, to advance?

Are you breaking down your health by confinement in some office or shop or factory with the possibility that if taken sick you lose your position and with it your pay?

If sick, is your medicine given you free? Is a doctor paid to tend you? Do you have a trained nurse supplied by your present employer?

If crippled doing duty, are you pensioned and cared for—FOR If your best years have been spent giving your efforts to an-

other—will he care for you and yours in your declining years? Are your clothes supplied free—Is your board and lodging, furnished with your pay, or do you have the unending struggle

month after month to try to meet your bills? You ask:—"Where is this all done, where board, lodging, clothes and medical attendance are given in addition to pay, where promotion may be had for the ambitious and deserving, and in fact, where every question asked above may be answered for your betterment, if you are not already getting these necessities with your

pay?' "Where you may lead an open air life with full physical training."

"Where you may circle the globe or tour the wide world with travel expenses paid and with your pay going on just the same and where the same pay may be put under the protection of the United States Government.'

There are twenty-eight boxes that asperating delays became untenable. The arbitration struggle of the men on the Western lines nearly two years ago, which ended in almost a complete fiasco, and the seemingly endless negotiations that preceded the enactment of the Adamson law, illustrate the methods adopted by the general managers and also show the tremendous expense of time and money to which the brotherhoods were jected in adhering to their isolation and peace-at-any-price policy. It is not generally known but nevertheless a fact that for two years before the Western arbitration proceedings culminated in Chicago the brotherhoods employed a corps of expert investigators and statisticians to compile the necessary data to present to the arbitration court in the hope of winning their case. The outlay for that one item alone approximated \$750,-000, and the total expense of the arbitration must have exceeded a million dollars. The cost of the conciliation proceedings in the eight-hour campaign was undoubtedly much greater, although no information is available at present upon which to base a fair estimate. On the other hand, the expenses of the score or more crafts employed in railroading that are not included in the brotherhoods also totaled into huge sums and the rich man's chances of getting into have become burdensome to the unions in interest. MILITARY TRAINING OF SCHOOL BOYS DENOUNCED BY DEBS

Responsive to a request from the officials of the Yearly Meeting of Friends at Philadelphia for an expression of his views upon the question of the military training of school boys, Eugene V. Debs contributed the following to the symposium upon that subject:

"I am absolutely opposed to the military training of school boys for the reason that such training develops the military instinct and kindles to flame the base passion for military

"Military training of school children, deny it as may those who are craftily scheming to introduce it in the interest of the ruling class, is the first step toward militarism, and militarism in all its forms and manifestations is an abomination that should be wiped from the earth.

"As long as we teach our school children a false and vicious patriotism and train them how to kill under the plea of love for the flag and the nation, we shall have armies and navies and machine-guns, and we shall have war with all of its unspeakable horrors. I would sink all of these to the bottom of the sea. War is simply murder in its most terrible form and a nation that prepares for war is not civilized.

"I would no more teach school children a false and would teach them arson, robbery or assassination." Eugene V. Debs.

The Great Irish Opportunity

By CORNELIUS LEHANE.
Only once in a generation is an opportunity like the present afforded to reach the Irish element in America with the message of socialism. That opportunity has been provided by the Irish revolution and the Battle of Dublin.

This was the culmination of the labor revolt in Ireland which had been in process of development in that country for some years, and the Citizen Army of Ireland which fought in that battle was the military expression of the Irish labor and socialist movement. The message of the dead Connolly, brutally murdered by the masters in cold blood after the Battle of Dublin, propped up in a chair to face the firing squad because he was already dying from wounds received in action and could not stand, should be placed before the Irish people of the United States. A certain footing has been already gained amongst the Irish, and that footing must be made the basis of a serious advance amongst the bulk of the members of that race. It is conceded on all sides that the Irish element cannot be ignored in the work of preparation for the socialist revolution in America, and one of the most important problems is how to reach and educate the mass of the Irish workingmen in this country.

The solution is now at hand,

Connolly left behind him some of the greatest masterpieces of the liter-ature of the socialist movement of the world. His "Labor in Irish History" is a marvellous application of the Marxian key to the history of Connolly's native land, and the remarkably simple style in which it is written

In this age of hard reality, and especially in our movement so firmly proclaiming the materialistic conception of history—the aery fairy folk have to run for cover. Fairy "the truth, the whole truth, and nothing but the truth". Yet those of us who are not yet too

For everybody, even the boldest thinkers, slavery is at that time a list and natural thing, and for religious people it is divinely ordained. One of the world's greatest thinkers, Arthootle, was forced to believe that nature had created a race of men appecially destined for servitude. In this he was in accord with the book of Genesis, which declared that the pro-Genesis, which declared that the progeny of Ham was to furnish slaves for the other races descended from mankind has not reached a sufficientmankind has not reached a sufficient-Noah. A FOREIGNERS VIEW OF OUR OWN H. C. OF L.

"In Australia we believe that a government which cannot control prices for the benefit of the people is not living up to its obligations as a democracy."

These are the words of Patrick E. Quinn, government commissioner for New South Wales, in an address in this country. This utterance is especially timely when prices of all staple food products have soared to unprecedented figures and the United States government is, or pretends to be, unable to impose a limit

Three causes are generally cited for the present soaring of prices—crop shortage, increased exports, and speculation. Of these the first is more apparent than real. No one claims that there is any shortage in the egg, milk, butter, meat and coal "crops". Moreover it is probable that enough staples of all kinds were produced this year in this country to supply all our needs. With regulation of exports and speculation, it seems that Congress could take immediate remedial action if so disposed. What Australia has done in similar conditions as outlined by Mr. Quinn is encouraging.

"With speculators holding a gun to the heads of the American people, your situation seems to demand drastic measures." said the Australian ialism a live issue and that itself was worth while. If we had about forty meat, poltry and like foodstuffs to eight states like Oklahoma we would boost prices is only less criminal than jar this country from Wall street to the turrets of the Santa Diego fair.

HIS WHISKERS WILL FADE.

Some people who are still wearing the lephants in their button holes may not believe it hut when the history of prices in the United States, where not believe it but when the history of this country is written Debs will be a larger figure than Hughes.

WILSON UP TO EXPECTATIONS.

Laboring men who voted for what they didn't want when they cast their ballot for Wilson are liable to get it sooner than they had expected. Word comes that the American Federation of Labor is greatly agitated because in the United States, where the use of the United States, where is no regulation, and compare it with the reasonable prices obtaining in my own country of New South Wales, where food prices are controlled by the government, it is a strong temptation to say: 'Go thou and do likewise'.

"Thanks to our control system housewives in Sidney and other large cites pay about 25 cents a dozen for

method of arbitration for railroad men. This is compulsory arbitration before a tribunal, which sees to it that the workingmen get the worst of it. Under this law strikes are outlawed and the workers with a grievance are put to sleep by arbitration. That is what might have been expected of Wilson the radical. No doubt the president was sincere in advocating the Adamson law, particular-like transport of the process of the p

In Australia the housewife gets 3,000 yards for a nickel. The American housewife gets 1,000. This is all the more remarkable when you consider that all our cotton must be shipped from England or America as we grow

"Of course many of our dealers chafe under the fair-price system, just as they would in the United States, but that doesn't stop regulation. Here, it seems to me, they are permitted to beloud the issue."
